

Diamond Nectar®

Ultra-pure, 100% natural bio-stimulator

The biggest boost you can give your plants after nutrients is a high quality Fulvic acid, and Diamond Nectar® is the best in the world

Soluble Humates contain a myriad of natural plant growth promoting compounds plus nutrient enhancing ingredients. Of these, Fulvic acid are the substances that do the real heavy lifting by making minerals more easily absorbed by plants, making nutrients more effective.

We analysed and tested many different Leonardite sources from around the world to give our proprietary, pH balanced, Fulvic acid the maximum agronomic benefits to deliver:

- Better root development
- earlier harvests
- healthier, disease resistant plants
- enhanced quality of flavour and fragrance
- increased essential oil production
- significantly higher yields.

No matter what concentration a product claims, it's the quality and composition of the Fulvic acid that counts - and this is why Diamond Nectar outperforms the competition.

Available in: **0.5 L • 1 L • 5 L • 10 L • 1000 L**

HOW TO USE:

Add to every watering or feeding or use as a foliar spray up to early flowering/fruitletting. To improve germination, soak seeds in diluted Diamond Nectar solution.

- **Solution:** 2 ml /L
- **Foliar spray:** 3 ml /L
- See feed charts p. 57

USE WITH:

- All GHE and other brand nutrients and substrates, mineral and organic, in hydroponics and outdoor gardening.
